Lab 8

Due Dec 8, 2020 by 11:59pm **Points** 20 **Submitting** a file upload **File Types** docx **Available** until Dec 15, 2020 at 11:59pm

This assignment was locked Dec 15, 2020 at 11:59pm.

Statement of Authorship

- Lab to be done individually
- In order to be graded, the following Statement of Authorship must be present at the beginning of the document
- I, Firstname Lastname, student number 123456789, certify that this material is my original work. No
 other person's work has been used without due acknowledgment and I have not made my work
 available to anyone else.
- Replace Firstname Lastname with your name and 123456789 with your student number

Introduction

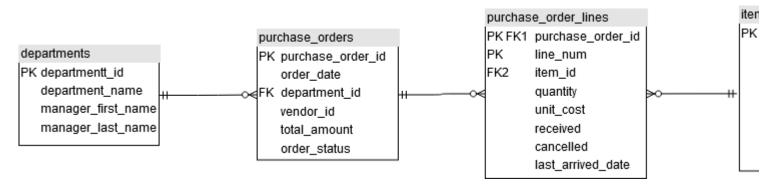

This assignment deals with a case study describing a company for which you will create an Entity Relationship Diagram (ERD).

Overview

- Normalize all the reports that you find in the case
- Use https://app.diagrams.net/) to produce an ERD for your system, hand-drawn ERDs will not be accepted

pple ERD Segment

This sample is meant to illustrate what is expected. If a table has more than one foreign-key, label them FK1, FK2, etc.

Start Word and create a file named **lab8.docx**. Do all of your normalization rough work in the document. After all of your rough work has been done, create the ERD in https://app.diagrams.net
(https://app.diagrams.net

Vintage Console Nation - A Database Design Case

Vintage Console Nation (VCN) is a burgeoning company that grew out a small basement operation that originally imported modchips for game consoles and then resold the modchips. VCN now specializes in buying vintage and clone consoles from offshore suppliers (most of them in Pacific Rim countries) and then distributing the consoles to retailers. The items carried by VCN include vintage and clone consoles for Playstation 1 and 2, Nintendo 64 and SNES, and Dreamcast. In addition, the company also distributes controllers, memory packs, rumble packs, etc.

The company does not sell directly to individuals but as mentioned, sells to established retailers. VCN has sales reps in the field who take orders from electronic stores and department stores. There are also inside sales reps who take orders over the phone or through fax and e-mail. There is also a business-to-business web application set up to accommodate incoming orders.

Whatever the source of the order there is one common order entry application that processes sales orders as follows:

- Sales order header information (Customer Id, Sales Rep ID, etc.) is entered
- Line item information (Product ID, Quantity, etc) is entered
- Inventory is checked for availability and updated
- Customer credit is checked
- The sales order is written to the database as an open sales order

shipping order is sent to Distribution (a copy of the sales order)

When distribution ships product, data is entered to update the open order data. The data entered is amount shipped for every line item and date of shipment. The inventory is updated.

Once each day invoices are written for all shipped orders and the open order data is updated and the invoice data is used to update the customer's A/R balance.

Throughout the month payments are received from customers and the customer's balances are updated. At month-end, the customer statements are run and sent to the customers.

At any time during the month:

- It may be necessary to check the status of a customer's order
- At any time during the month, inventory status may be analysed
- At any time during the month A/R balances may be analysed

Throughout the month it is possible that the on-hand quantity for an item may reach the reorder point. When this happens, a purchase order is written and sent to the vendor. An open purchase order entry is inserted in the database to record goods on order and to permit processing later. When the goods are received the open purchase order and inventory are updated. When the vendor's invoice is received, the A/P clerk matches the invoice to the open purchase order and enters the invoice data for A/P processing at month-end. At month-end cheques are written to the vendors and the invoices paid are updated in the database.

                                               450.00
```

Note: On purpose, two vendor invoices are shown with the same invoice number. Is this coincidence likely? But, can you guarantee that it would never occur? Many companies use a voucher system where they create their own internal document to reflect the receipt of a vendor's invoice?

Open Purchase Order Inquiry

Purchase Order ID	Vendor ID	Item ID	Quantity	Purchase Order Date
			•	
29932	403	215	25	15-Feb-2019

		291	50	15-Feb-2019
29945	644	275 304	12 10	22-Feb-2019 22-Feb-2019

Of primary interest here are the Purchase Orders overdue, i.e. the ones where the goods have not been received yet.
